

Turn-Key eDiscovery Service

Level the Legal Playing Field with Enterprise-Class eDiscovery made Cost-Effective for Small and Medium Business

► BENEFITS OF TURN-KEY eDISCOVERY

- Levels the eDiscovery playing field
- Ensures that your data handling is compliant with the Federal Rules of Civil Procedure (FRCP)
- Puts the Capax Discovery team of eDiscovery veterans on your side
- Gives you access to the best eDiscovery infrastructure available
- Offers the most cost-effective eDiscovery method possible
- Removes the burden of risk management for your administration team
- Removes the burden of provisioning, deploying, and maintaining risk management tools from your business
- Helps you meet deadlines to produce any type of Electronically Stored Information (ESI) to the court
- Lowers the cost of archiving data
- Lowers the cost of primary storage
- Lowers your business risk of losing a case due to eDiscovery requirements
- Shortens the legal review process and associated costs
- Delivers more and more relevant data as data volumes are reduced through the eDiscovery process

► MEET eDISCOVERY CHALLENGES WITHOUT BREAKING THE BUSINESS

Planning for legal discovery can be overwhelming and expensive. Purchase and deployment of all of the eDiscovery tools that you need adds complexity and cost to your business. Just having the tools is no guarantee that your team is prepared to use them. Going up against larger companies with their expensive legal systems can be intimidating and expensive; without the right experience and expertise you can still lose a case.

You need a team of eDiscovery experts armed with the best legal systems in the world. But your business cannot afford an eDiscovery arms race.

► PUT CAPAX DISCOVERY ON YOUR SIDE WITH COST-EFFECTIVE SAAS HOSTING SERVICES

Capax Discovery offers turn-key eDiscovery services designed to meet your legal challenges head-on with the best team of eDiscovery experts using the world's leading eDiscovery software from Autonomy. We offer Software-as-a-Service (SaaS) hosting to take the burden of risk management off of your business. Our flexible month-to-month leasing terms make it easy for you to predict your eDiscovery costs and budget accordingly.

Discovery services that you gain:

- Remote active-archive and preservation of your email, including Microsoft Exchange mailboxes and PST files, and Lotus Notes mailboxes and NSF files
- Comprehensive archive of all types of electronic data including audio and video files, unified messaging, Instant Messaging, SharePoint documents, and system files
- eDiscovery processes which are compliant with the latest Federal Rules of Civil Procedure (FRCP)
- Consistently applied processes which are repeatable and legally defensible
- Transparent data retrieval by end-users, which is supported by a local archive cache to ensure fast performance in combination with a remote repository
- Preservation of your data according to your compliance and retention policies
- Legal hold capabilities which preserve data from the point at which you know a case is pending
- Complete search and retrieval of all relevant data when discovery actions occur, performed on your behalf by our eDiscovery experts
- Culling removes unresponsive data before delivery to your legal team, which helps to shorten the legal review process and lower associated costs
- Active keyword and meta-data sampling on email to meet SEC requirements for Broker Dealer businesses

► WHY CAPAX DISCOVERY?

At Capax Discovery, we offer the only SaaS Hosting services based on Autonomy solutions for end-to-end support through the complete EDRM lifecycle. EDRM is an established standard for eDiscovery proven to deliver more relevant data as data volumes are reduced through the production process. Our eDiscovery veterans archive and preserve your data and remove the burden of eDiscovery from your organization.

► ABOUT CAPAX DISCOVERY

Capax Discovery, a division of Capax Global, is a service provider for eDiscovery and archiving. Powered by leading search and retrieval technologies from Autonomy, we offer end-to-end solutions to meet the growing regulatory and litigation challenges that confront businesses today. We are an Autonomy Premiere Partner and the only partner to offer Software as a Service hosting for the complete EDRM lifecycle. We have extensive experience implementing, optimizing and supporting discovery solutions for Fortune 500 and FTSE 350 companies. That experience translates into a better services engagement, lower costs, and lower risks for our small to medium sized eDiscovery customers

BASE YOUR BUSINESS ON THE BEST EDISCOVERY PLATFORM IN THE INDUSTRY

Capax Discovery experts are trained on the latest Autonomy solutions and are experienced with all steps in the eDiscovery process. Our datacenter infrastructure scales seamlessly to support you with enterprise-class discovery, performance, and reliability. We preserve your data safely and cost-efficiently and produce it quickly when you need it.

Our discovery environment includes:

- Autonomy IDOL Platform technology
- Autonomy Enterprise Archive Solution (EAS)
- EAS Discovery
- Early Case Assessment (ECA)
- Introspect
- EAS Supervisor

You benefit from our world-class hosting facilities, a state-of-the-art Tier 2 datacenter with diesel generators, fully redundant connectivity, and around-the-clock staffing to support continuous operation. Our security and network capabilities ensure your archived data is secure. Our storage systems include backup, disaster recovery and restore to ensure your archived data is protected.

GET STARTED QUICKLY AND EASILY WITH TURN-KEY EDISCOVERY

Our team of seasoned eDiscovery veterans perform the critical process of collecting and loading your Electronically Stored Information (ESI) from a variety of sources, including backups, archives, and EDRM XML load files. Working with your team, our experts define the loading process for exception matters, filters and post-loading requirements.

Once in the archive, your data is organized for quick and easy eDiscovery. We offer optional Data Collection and Culling (DCC) service for real-time eDiscovery of files from your production environment, as needed.

In addition to handling your data archive and eDiscovery challenge, we also lower your storage costs by removing stale and unused data from primary systems.

WORK WITH A PREMIERE AUTONOMY PARTNER

Capax Discovery is a Premiere Partner with Autonomy, the global leader in enterprise search and eDiscovery. Our vibrant Discovery practice serves enterprise Fortune 500 and FTSE 350 organizations with professional services designed to optimize their Autonomy deployments. This experience benefits our small and medium sized businesses for which our SaaS Hosting service practice is designed.

Find out how eDiscovery can be enterprise-class, cost-effective, and burden-free for your small or medium business.
