

## CAPAX GLOBAL COMPANIES

Capax Global is the foundation for the group of companies belonging to the Capax family of consulting services teams. Although led individually and focused on specialized competency areas, Capax companies share methodologies, hosting infrastructure, and consulting networks. The cost-saving advantages provided by these shared resources are passed along to Capax clients worldwide.

### ABOUT CAPAX ALPHA

At Capax Alpha, a division of Capax Global, we specialize in meeting the specific needs of Hedge Funds and Alternative Investment companies. Our clients benefit from access to Capax Global's extensive network of over 700 of the world's best technologists, people who happen to be great with harnessing complex technology to serve business.

### ABOUT CAPAX DISCOVERY

At Capax Discovery, we specialize in optimizing Autonomy deployments, at lower cost, and with reduced burden on your business. Autonomy enterprise customers benefit from our Healthcheck and Support services, designed to enhance existing Autonomy deployments and supporting environments. Small and medium business customers benefit from our hosted Autonomy services, which are unique in providing services that support the entire Autonomy EDM eDiscovery model. Any Litigation Support team, whether internal or third-party, can benefit from using our hosted Autonomy single-platform services.

### ABOUT CAPAX GLOBAL

At Capax Global, our stated objective is to leave every client organization stronger than we found it. We employ over 700 of the world's best technologists, people who have deep knowledge of the industries that we serve, including financial services, accounting and auditing, pharmaceutical and media industries. We specialize in providing end-to-end solution delivery of whatever you need to make your IT successful, including solution engagements that support everything from shrink-wrap product deployment to custom application development, application hosting and technical staffing solutions.

## Why Capax Global?

At Capax Global, we offer the best possible consulting experience in the world. Our people are the best technologists available. Our business acumen helps us partner with you better. Our methods are designed to deliver business results. Our flexibility makes us easy to work with.

We invite you to experience the difference for yourself. Work with the consulting services team that Microsoft and Autonomy rely upon to solve their most important customers' technology challenges.

**Our people are the best technologists available:** Our unique method for recruiting and retaining their services as part of our vast consulting network ensures that we always have the best, most experienced technology consultants available for your projects while also offering the kind of freedom and autonomy which highly skilled people demand.

**Our business acumen helps us partner with you better:** Each Capax Global practice area is independently led by proven business people who come from your industry, who speak your language, and who understand your concerns. As a result, we offer you the opportunity for real partnership in solving your toughest challenges.

**Our methods are designed to deliver business results:** Our holistic, business-oriented approach to technology ensures your goals are met on every project. We don't waste your time and resources; we get your project right the first time.

**Our flexibility makes us easy to work with:** We offer a full range of consulting services, hosting, and staffing solutions. This makes it possible for us to support you in any way that you need to be supported. Our flexibility also extends to financing where our willingness to work with your budget and payment schedules can make all the difference.

Find out why 400 of the Fortune 500 have relied on our team for their Enterprise Content Management, Microsoft, and Information Management requirements.

HARNESSING TECHNOLOGY FOR THE WORLD'S LEADING INDUSTRIES

*Capax Global is a premier Microsoft Consulting Services partner supporting Microsoft technology deployments and custom implementations. We are an Autonomy Global VAR and premiere services provider for both Search and Discovery businesses. Our client base includes 400 of the Fortune 500, representing all major sectors. In operation for over 15 years, we maintain a network of over 700 of the world's best technologists working out of nine offices in the US and around the world.*

Capax Global offers a comprehensive suite of Professional Services designed to extend the capabilities of your internal IT team with whatever services you need to ensure the success of your technology project. Our flexible engagement models include everything from direct staff augmentation services in which you select consultants to fill specific roles within your organization to complete solution engagements.

Our solution engagements include discovery, design, development, test and delivery of technology solutions, along with experienced project management services. Our team can also work with one of your project managers to meet specifically defined project objectives.

## What services do we offer?

Our services methodology is built on re-usable technology components, refined and proven by our team working with hundreds of organizations just like yours. We also use our unique best practice methods. These components and methods are designed to save your consulting service investment, speed your project, and increase the value of the project by delivering real business results.

Our Professional Services offering includes:

- ▶ Healthcheck Audits
- ▶ Solution Engagements
- ▶ Business Requirements Analysis
- ▶ Project Management
- ▶ Solution Delivery
- ▶ Software Architecture & Development
- ▶ Staffing Solutions
- ▶ Hosting Services

**“Working with a consulting group partnered so closely with Microsoft gave us the assurance and confidence to trust this team with our most important project. The Capax team never wavered in the face of daunting technical challenges. The end result speaks for itself. Great work!”**

IT Director, Fortune 100  
Financial Services Firm

# Professional Services Benefits In Detail

## HEALTHCHECK AUDITS

We audit your current infrastructure to find the biggest problems and opportunities for improving performance, securing infrastructure and data, lowering costs, and lowering administrative burdens. We help you to prioritize projects to ensure you tackle the biggest problems first. We assess your existing deployments for readiness before you tackle big projects.

## SOLUTIONS ENGAGEMENTS

Encompassing all phases or selected phases of a technology project, we work with your requirements to design a custom solution engagement. Our proven methods and experience help to ensure predictable budgets and timeframes, minimal disruption of your production environment, measured Return on Investment, and superior technology design. Superior technology design offers lowered costs of maintenance and operation as well as a better technology foundation to grow with your business.

### **Our Solutions Engagements include these key functions:**

#### **Business Requirements Analysis**

We draw on years of business experience to identify, define, and evaluate technology requirements for your business. Our team can also augment a project already under way, to help ensure that you obtain business results from technology investments.

#### **Project Management**

Our Engagement Managers have experience with all of the common technical project management approaches such as SCRUM and Agile and can therefore adapt to any existing standard your Project Management Office might require. Our engagement managers are experienced risk managers and will use project status reports, project plan updates, user acceptance test cycles and regular interaction with the project team as needed to keep you informed on project progress.

## APPLICATIONS DEVELOPMENT

We offer custom applications development – from architecture and design to development and test – on select technology platforms. Our experience includes applications implemented for risk analytics, stock and security lending, media content management, and more.

## SYSTEMS MIGRATIONS

Our teams are expert at consolidating your platforms and systems with efficient, high-speed, proven migrations. Our migrations include your entire systems stack, from data and database systems, to applications and workflow processes upon which your business depends.

## STAFFING SOLUTIONS

When your business demands new IT solutions that outpace your ability to hire specialists and train your team, augment your team with Capax Global technologists. We supply the technical specialists that you need, matching the placement options that you require including permanent placements, temps, and consulting.

## SAAS HOSTING SERVICES

When your IT needs outgrow your infrastructure's capability to keep up, consider augmenting your internal systems with "Software as a Service" hosted services running on our world-class datacenter infrastructure. Select our Dedicated Services for more systems capacity under your remote management. Select our Managed Services when you need management assistance in addition to more capacity.
